

Mr. OGILBY's
TABLES^{2.}
OF HIS
Measur'd Roads.

So Digested, that any great Road or
Branch may readily be found;
with the General and Particular,
Computed & Measur'd Distance,
and the Distinction of Market and
Post-Towns.

With other

REMARKS.

To which is Added,
A true Account of the
Markets and Fairs, &c.
Collected in his Survey.

By JOHN OGILBY, Esq;
His Majesty's Cosmographer.

Licensed March 31th. 1676.

H. Oldenburg.

LONDON,
Printed by the Author, and Sold
at His House in White-Fryers.

1676.

ADVERTISEMENT.

MR. Ogilby to prevent the Injury design'd Him and the Kingdom, by the Publishers of certain Tables stolen out of his Book (so ignorantly and carelessly Collected & Printed, that they are fill'd with false Computations and Directions; often sending the Traveller 10 or 20 Mile out of the Way) did Print his own Tables in 4 Broad-sides, with his Name to each Sheet, which he hath now Re-printed in Octavo, with the Addition of many more Roads, and a true Account of the Markets and Fairs, Collected from the Towns themselves in his Actual Survey, the Price 1 s. in Sheets, and a large Sheet-Map of England with all the Roads, fitted to Bind with the Book, the Price of the Map 1 s.

Sold by the Author at his House in White-Fryers, and by Mr. Cade Stationer, at the Royal-Exchange in Cornhil; Mr. Isted, at the Anchor against St. Dunstons Church in Fleet-street; Mr. Harding, at the Bible and Anchor, at the West-End of St. Paul's; Mr. Pask, at the Stationers Arms and Ink-bottle, under the North-side of the Royal-Exchange; Mr. Morden, at the Atlas in Cornhil; Mr. Cadman, in the lower Walk of the New-Exchange in the Strand, Mr. Nott, at the King and Queens Arms in the Pall-Mall; and by several Book-Sellers and Stationers.

And Itinerarium Angliæ: Or, The Book of Roads, containing a Hundred Whole-Sheet Maps; expressing, at one Mile in an Inch, all Things observable in the Travelling-Part of England and Wales, the Price 40 s.

The Maps of any the several Roads fitted to bind up in a Pocket-Book, are also Sold, the Price 6 d. a-sheet.

And several large Prints and Maps of Mr. Ogilby's, viz. Adam and Eve, Jerusalem in two Sheets, Solomon's Temple, Eden.

Advertisement, &c.

Edenborough in two Sheets, King's-lyn, Tangier : America, Carolina, Jamaica, Maryland, Barbado's, Middlesex, Kent, &c. At reasonable Rates.

This is also to give Notice, That the Sheet-Map of London, mention'd in the Printed Catalogue of Books last Term, said to be Publish'd by J. O. is not Mr. Ogilby's, for he resolves to Publish his Map with a Scale of Feet, that the Truth may be Examined, which this Counterfeit wants: The true Map will be suddenly Finish'd, and because there are several false Maps preparing, you are desir'd for the future, to Receive nothing for Mr. Ogilby's, that hath not his Name, and Title of His Majesty's Cosmographer to Warrant it.

EXPLANATION.

EACH Page is Divided into two *Collumes*, where, having read the Title and principal Towns contain'd in that *Road*, you begin the Left-hand *Collume* and read to the Bottom, unless struck through with a Black-Line, which always directs to begin the next *Collume*. For Example,

No 3. Page 4. You must not read, York, Newcastle, Durham, Barwick, but, York, Durham; Newcastle, Barwick, as if they stood all under one another, as No 1. Page 2. where having read both *Collumes*, and Ending at *Aberistwith*; you begin the 3d. Page with the Branch to *Buckingham*, the Four Towns at the Beginning you read as before, and then begin the 1st *Collume*, at, To *Ux-bridg*, &c. whence, proceeding to *Little Missenden*, you begin again at the Top, not

at *Ailsbury*, but at *Great Missenden*. And so of the Rest.

I. The 15 great Roads from *London* to the Extent of *England* and *Wales*, as, *Holyhead*, *Barwick*, *Dover*, *Rye*, &c. are Plac'd Alphabetically, and Numbred 1, 2, 3, 4, &c. the Letter of the last Town taking place: As, No 1. is the Road to *Oxford*, *Worcester*, and *Lempster*, yet *Aberistwith* being the Extent, it is Plac'd in *A*. So the Road to *Tork*, *Durham*, and *Newcastle*, continuing to *Barwick*, is Plac'd in *B*.

II. Immediately after each great Road, you have the Principal Branches: As, next after the Road to *Oxford*, and so to *Aberistwith*, you have the Roads from *London*, 1st. to *Buckingham*, and next to *Montgomery*.

And to avoid Repeating, you are Refer'd to the fore-going great Road for the several Towns and their Distances, till you come where you are to leave that great Road, as in the Branch to *Buckingham*, after the Names of 4. of the chief Towns, viz. *Amersham*, *Wendover*, *Ailsbury*, *Buckingham*, you begin the Left-hand Collume, and find To *Uxbridge* in No 1. where you may find the Towns and Distance from *London* to *Uxbridge*, as aforesaid. And so in the next Branch, which is the Road from *London* to *Montgomery*, you are Refer'd to No 1. for the Towns from *London* to *Worcester*; where you leave the *Aberistwith* Road and go to *Hallow*, which is from *Worcester* computed 1 Mile, but by Measure, 2 Miles six Furlongs, or 2 Mile 3 quarters.

Of these Branches you have 22. which end with *London* to *Harwich*, Page 20. where begin the Cross and Accidental Roads from one City or Town to another, the Town whence the Road issues taking place in the Alphabet, as, *Arundel* to *Chichester*, *Bristol* to *Chester*, *Chester* to *Hollywel*, and

Explanation.

Tork to Chester, &c. At the begining of each Road you have 2, 3, or 4. of the principal Towns upon that Road, either from London or other great Towns, as in the Holyhead Road, No 10. Page 11 and 12. you have the Road from London to Coventry; in Letter C. of the Cross Roads, you have the Road from Cambridg to Coventry; in P. 30 Gloucester to Coventry; in Page 38. Oxford to Coventry; that by the Towns at the begining of each Road, you may readily find what you Desire.

You have the *Computation* by Miles, the *Measure* by Miles and Furlongs, directed by M. and M. F. over-head. Where there is no Figures, that Town is not a Mile from the next, or admit of some odd Parts, not easily supply'd in the *Computation*, and therefore you are to Reckon from the last Number to the next Town with Figures: As, in No 1. Page 2. from London to Kensington Gravelpits it is accounted 3 Mile, but from the Standard in Cornhil it is measured 5 Mile; thence to Alton, passing Shepherds Bush, it is Computed 3 Miles, but by measure 3 Mile 3 Furlongs. And so of the Rest.

The Numbers with the Towns at the begining of each Road, is the general Distance from London, or the Principal Town; reckoning always from the Standard in Cornhil or near the Center of each other City or Town.

Cities are in Capitals, Market-Towns in *Italique*, and Post-Towns mark'd thus * as Page 4. * Waltham Cross is a Post and not a Market-Town, Hodsdon is a Market, but no Post-Town, * Ware is both Market and Post.

The Markets and Fairs are put Alphabetically, beginning with the Towns Names.
